

preparing your computer
to enter the virtual world

1 Install the Firestorm Viewer

To connect to the virtual world you need the Firestorm Viewer. Click on the following link and choose the suitable version of the viewer for **SL & Opensim** for your operating system. Once downloaded, open the file and follow the instructions to install the viewer.

www.firestormviewer.org/downloads

Please note: If your computer is running Windows then you should choose the appropriate version for your version of Windows (ie. Either 64bit or 32bit). If you are unsure, then download the 32bit version.

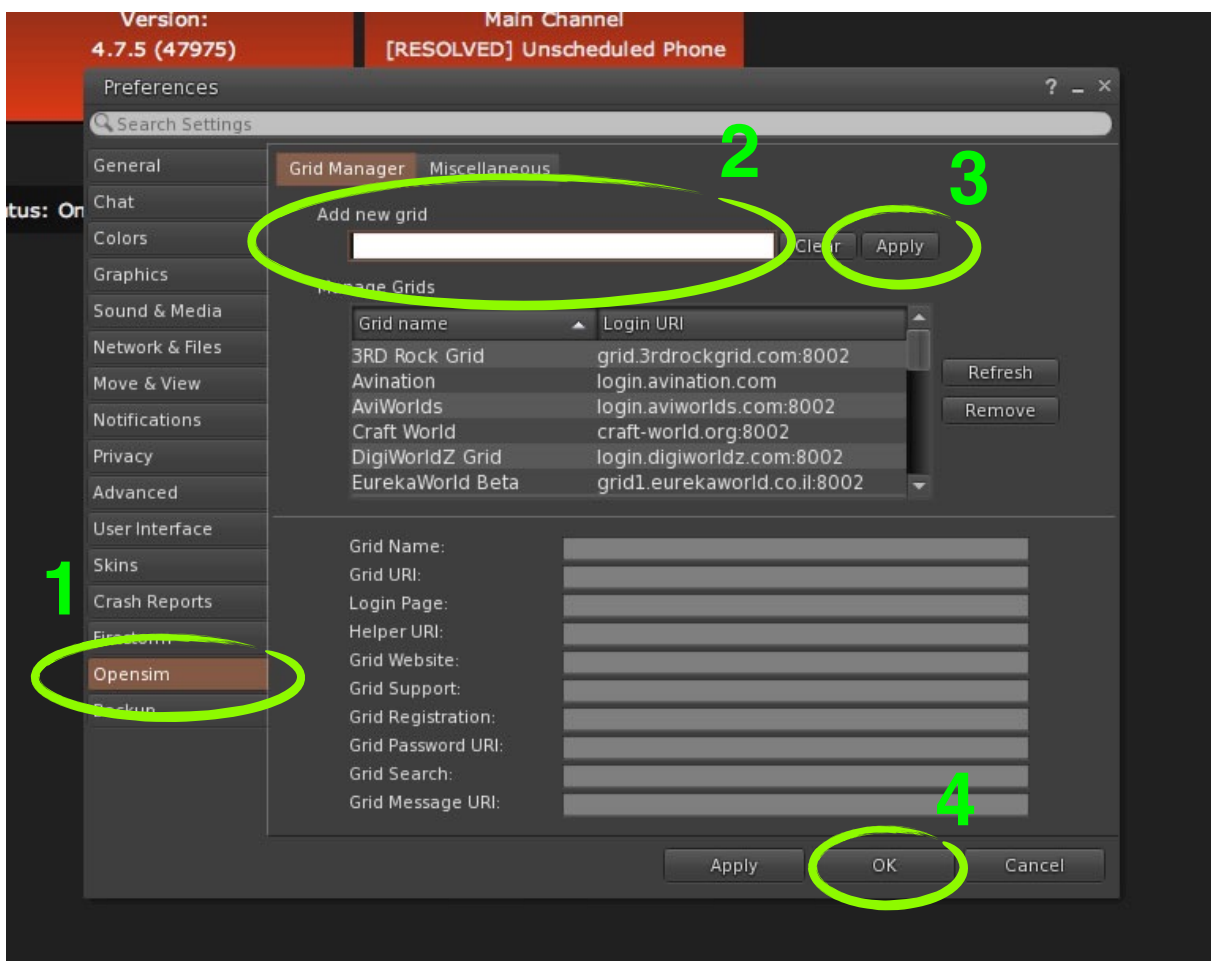

- For SL & Opensim 32bit: [Click to DOWNLOAD](#)
SHA1: 21F6BE62E349FB11D70FFD543BF8CFD87D1BCC42
- For SL & Opensim 64bit: [Click to DOWNLOAD](#)
SHA1: 62A42665593DE240E427E5EEAC631392AEBCE5DF

2 Add the EurekaWorld Beta grid to your viewer

- Open Firestorm and choose **Preferences** from the '**Viewer**' menu (top left) **OR** by clicking **CTRL + P**
- In the Preferences window, click on the **Opensim** tab.
- Add the following address to the '**Add new grid**' textbox and click 'Apply'.

52.18.185.60:8002

- You should now see a new grid in the list below called '**EurekaWorld Beta**'. If you got an error message instead then please check your connection to the internet and try again.
- With the new grid in the list, click on '**OK**' at the bottom of the preferences window.

3 Logging into the virtual world

- Type your username (First and Last name with a space in between) and your password at the bottom of the screen.
- In the 'Start at' dropdown, type the letters **Welcome Tec**
- Make sure 'Log into grid' is set to 'Eurekaworld Beta'
- Click 'Log In'
